Projects

Enterprise management applications

- This project was built by me only

• Description: Developed a Enterprise management applications using the Laravel framework, seamlessly integrated with Bootstrap for enhanced front-end design and user experience. The application incorporates essential features such as product management, notifications ,order processing, and user reviews.

• Project Website: https://siberserv.com/saudi/public/login

- This project was built according to the client's desire .

• Key Features:In this project, all means of convenience have been applied to facilitate the smooth and effective use of the application. Speed of response with the possibility of automatic renewal at the beginning of each month. Salary calculation for employees with an annual schedule for employees' salaries. The ability to add pictures. It is difficult for me to mention the collection of the application's capabilities, so I am satisfied with this.

• Technologies used:

->**Laravel Framework**: Leveraged Laravel, a PHP web application framework known for its elegant syntax and powerful features, for building back-end infrastructure .

-> **laravel breeze**: For the rules of the entry process .

->**Bootstrap Framework**: Bootstrap Integrated Framework, a popular CSS framework, for fast design Responsive and visually attractive front-end interfaces.

->**PHP**: PHP, a server-side scripting language, was used to implement dynamic functions and server-side logic.

->**MySQL Database**: MySQL, a relational database management system, was used to store and manage Data and used **laratrust**.

-> **ajax** : was used to ajax avoid reloading .

-> **Feature-Rich API**: Implemented a comprehensive set of features, including and category management, advanced searching, . Developed secure authentication and authorization functionalities using JWT, ensuring controlled access to various endpoints.

 - >**HTML/CSS/JavaScript**: The front-end interface was developed using standard web technologies along with Bootstrap components to ensure a seamless user experience across devices.

My portfolio

I build this project using html css js .

Elmasry Car showroom

- This project was built by me only
- Description:

Developed a Enterprise management applications using the Laravel framework, seamlessly integrated with Bootstrap for enhanced front-end design and user experience.

- GitHub Repository: https://github.com/AhmedAlaa8/Elmasry.
- Dashboard Admin LTE was used to facilitate and improve use.
